New Packaging for Oxi.Plus™ High-Flow Nasal Cannula

Dear valued Customer,

At WILAmEd, the consistently high and sustained quality of our products has been our top priority for 20 years. As your reliable partner we pursue a common goal: to ensure best patient care through individual, comfortable and effective therapies.

For offering the best patient care product, we continuously work on the further development and optimization of our products.

As of February 2019 onwards, the Oxi.Plus™ High-Flow Nasal Cannula will be packed and delivered in larger and more convenient auto-polybags with imprinted labeling and a schematic product outline. The advantage: better legibility and clearly arranged symbols. The resized box label has in addition a schematic product outline.

If required, don't hesitate to get in touch with your responsible contact person of our sales team.

Kind regards,

A handwritten signature in blue ink, appearing to read 'Michael Goerlitz', with a stylized flourish at the end.

ppa. Michael Goerlitz
