INDIVIDUAL
SOLUTIONS

Managers, decision-makers and healthcare professionals need clear information to quickly and easily select the right equipment for a wide range of treatment therapies in respiratory medicine.

Our product range reflects the knowledge we have gained over many years from hospitals in a wide range of countries.

If you have any questions about our products, please contact your WILAméd representative.

QUALITY BORN FROM PASSION

WILAméd products not only comply with legal medical technology standards but are also measured against our own strict quality requirements.

SUSTAINABLE PRODUCTION

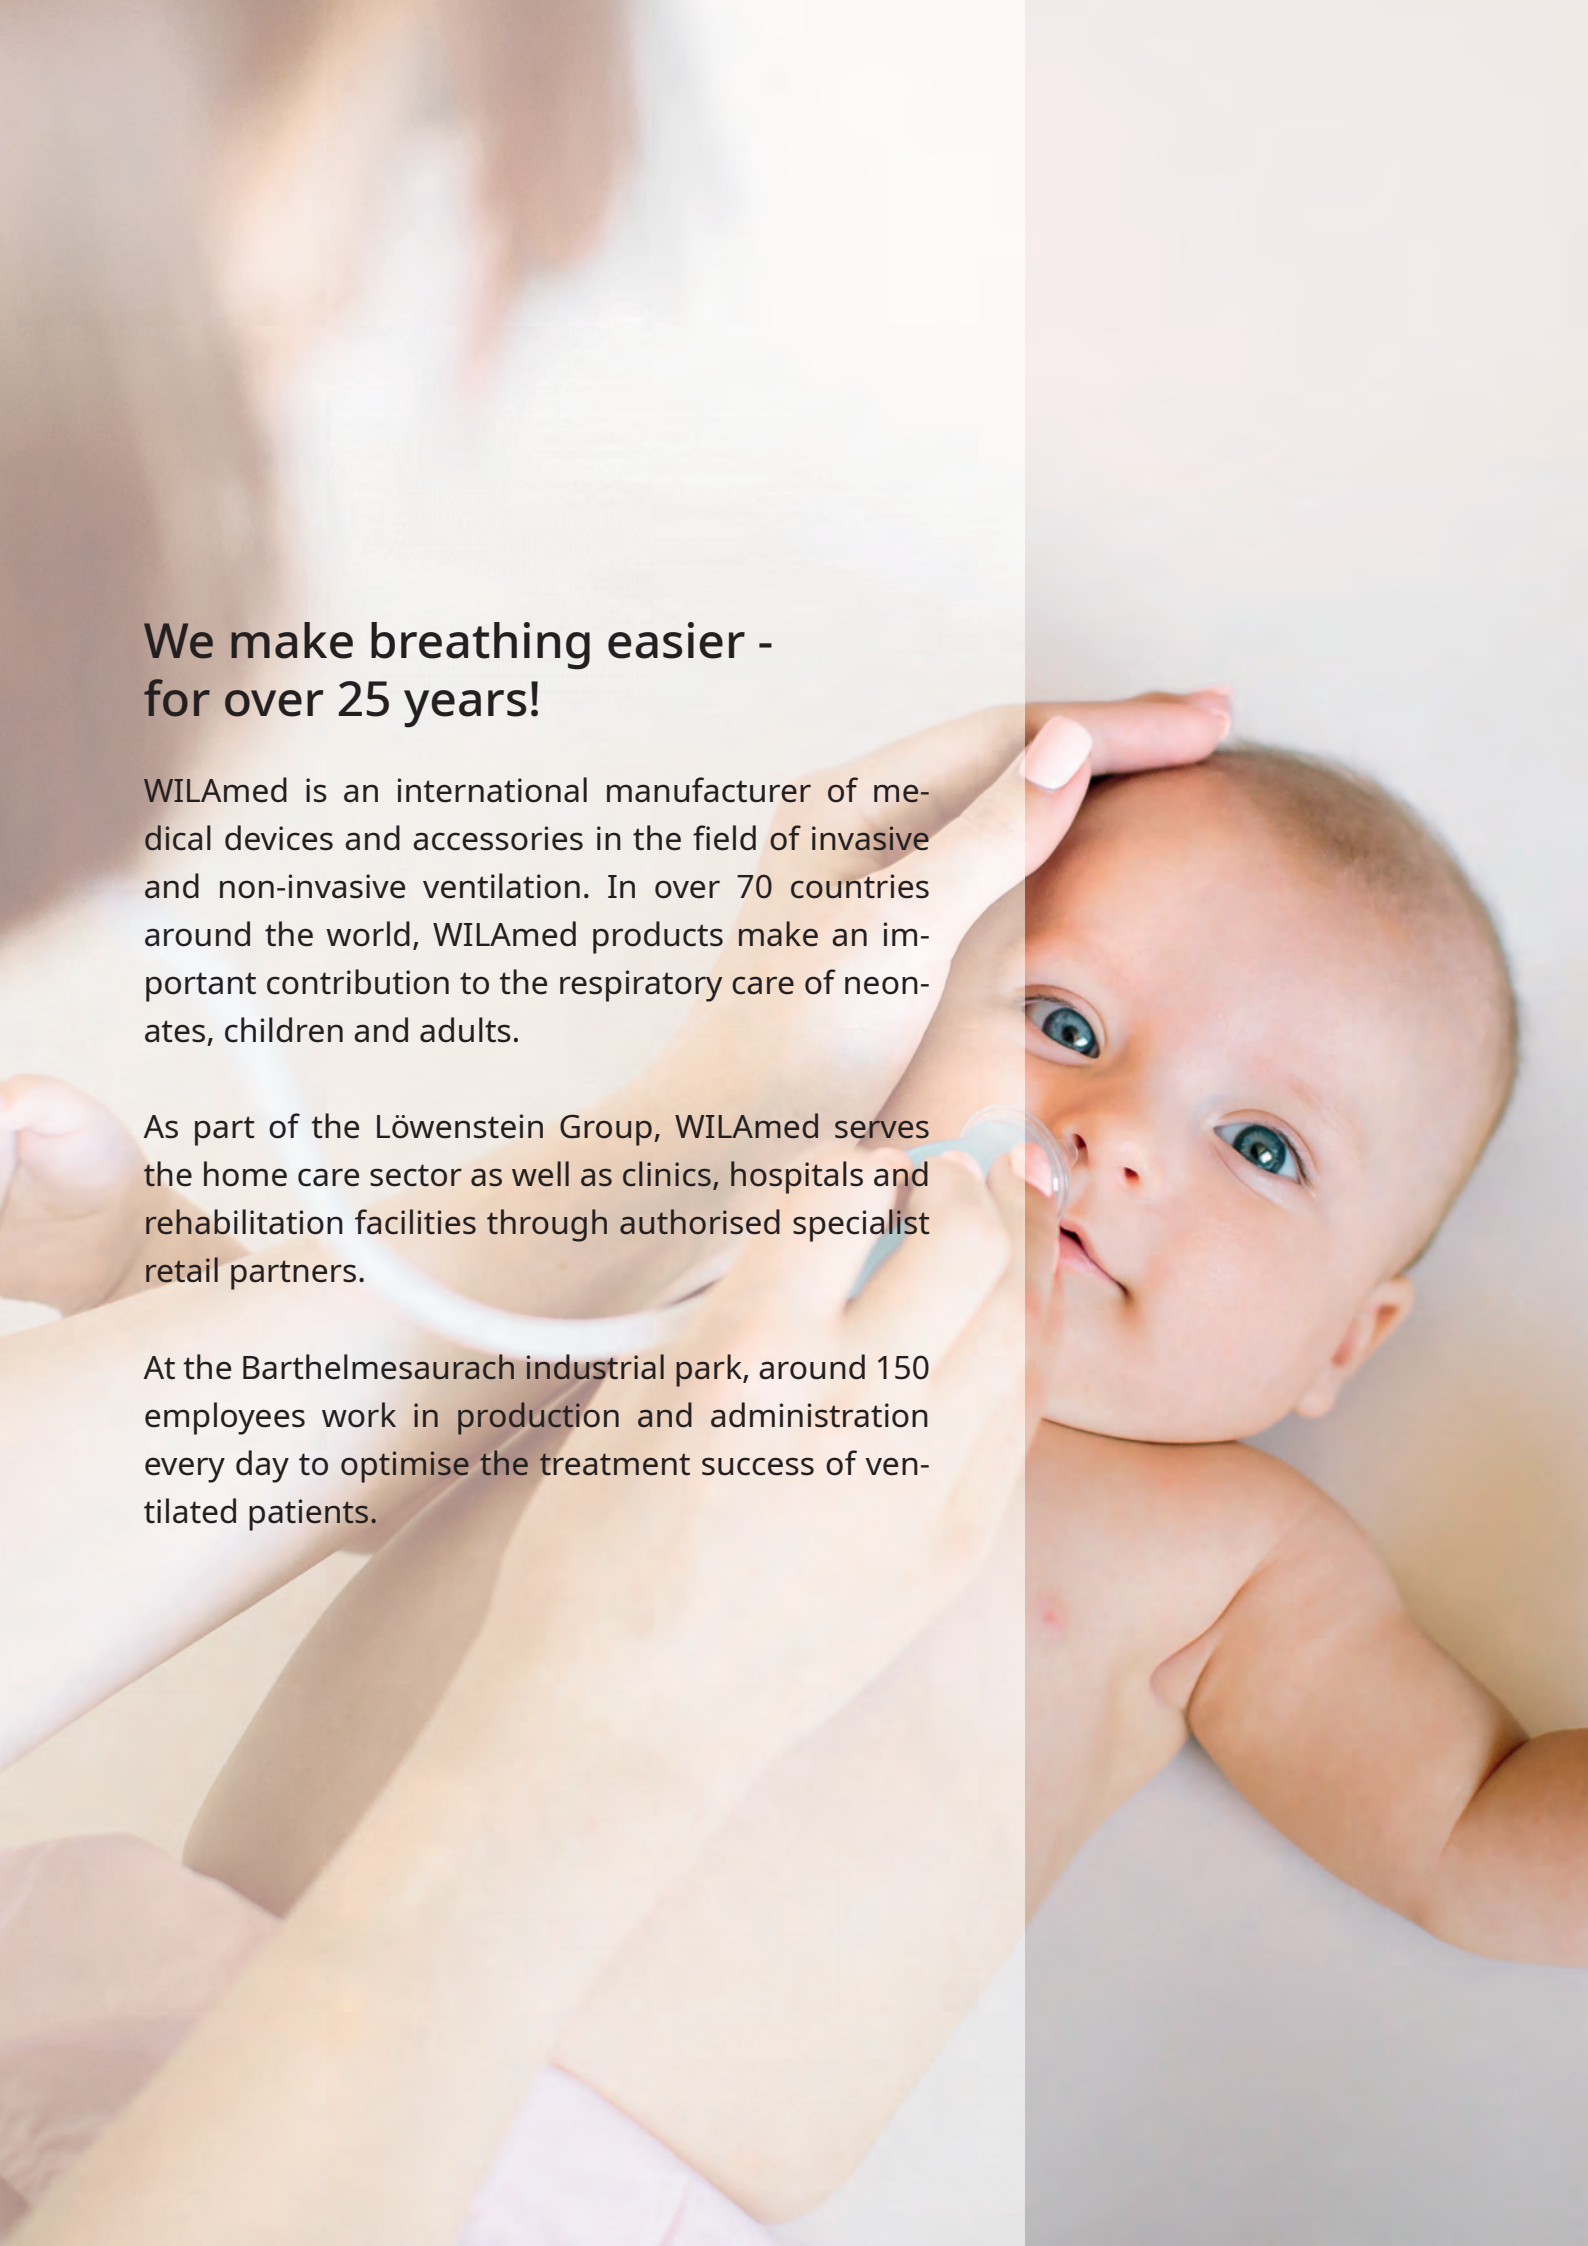

Modern, environmentally friendly production facilities and manufacturing processes, social responsibility, and sustainable investments at our Germany location ensure consistent product and process quality at the highest level.

OPTIMIZED SOLUTIONS

The result is perfectly coordinated products that ensure the best possible patient care.

We make breathing easier - for over 25 years!

WILAméd is an international manufacturer of medical devices and accessories in the field of invasive and non-invasive ventilation. In over 70 countries around the world, WILAméd products make an important contribution to the respiratory care of neonates, children and adults.

As part of the Löwenstein Group, WILAméd serves the home care sector as well as clinics, hospitals and rehabilitation facilities through authorised specialist retail partners.

At the Barthelmesaurach industrial park, around 150 employees work in production and administration every day to optimise the treatment success of ventilated patients.

ACTIVE RESPIRATORY GAS HUMIDIFIERS

AIRcon Gen2 Respiratory Humidifier

The **WILamed AIRcon Gen2 respiratory humidifier** is an effective complete solution for optimal respiratory humidification of mechanically ventilated (invasive and non-invasive) patients.

By warming and humidifying the respiratory gas, the natural cleansing function of the lungs, mucociliary clearance, is supported. This effectively reduces the risk of pulmonary infections or damaged lung tissue is thus effectively reduced.

The comprehensively upgraded AIRcon Gen2 is one of the most advanced respiratory gas humidifiers currently available on the market.

As a fully equipped respiratory humidification set, the AIRcon Gen2 with its extensive range of accessories is quick and easy to install, ensuring safe operation.

The **AIRcon respiratory gas humidifier series** has been well received by healthcare professionals since 2010 – whether in intensive care or home ventilation.

Scope of delivery:

- Respiratory humidifier / basic unit
- Electric heating wire adapter (INSP and EXP)
- Temperature probe

HUMIDIFICATION CHAMBERS

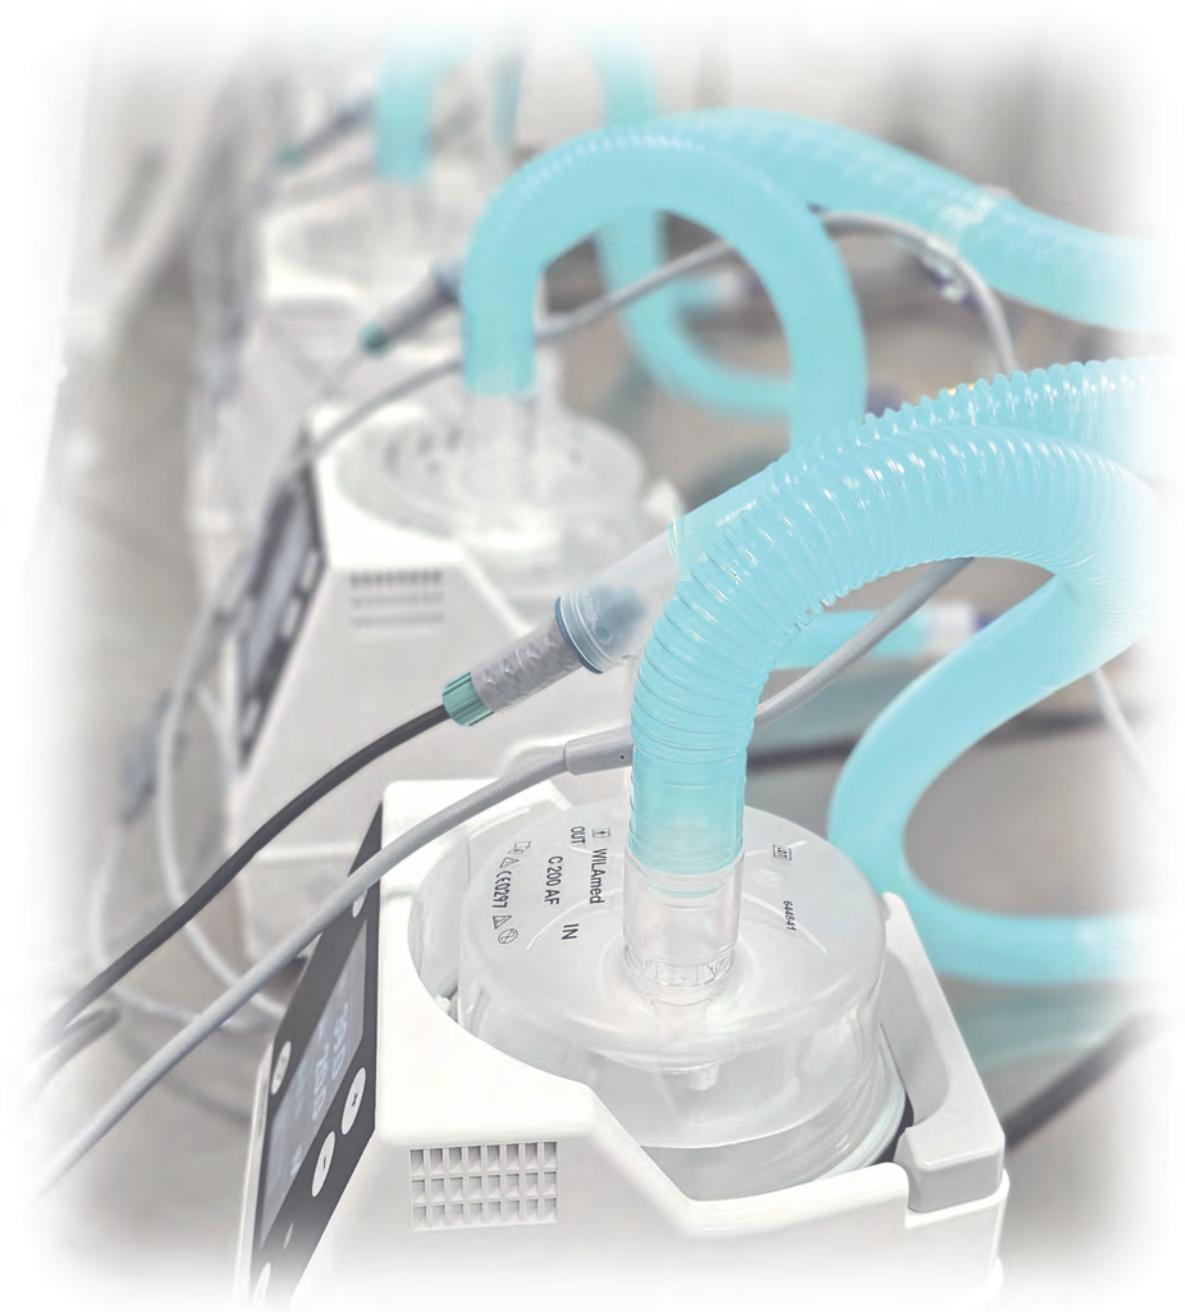

The humidification chamber is an essential component of our heated ventilation sets, so the two are also perfectly matched.

Thus, we ensure optimal respiratory gas conditioning for mechanically ventilated patients, both in clinical and non-clinical settings.

The C200AF Auto-Fill humidification chambers guarantee a constant water level, on the one hand due to our sophisticated float set inside the chamber and on the other hand due to the highly precise infrared water level monitoring of the AIRcon.

Our humidification chambers can be ordered individually or as part of a complete ventilation set (convenience kit).

With our sterile water „WILaqua“ we can offer a closed set completely from one source.

C200AF AIRcon humidifier chamber

Auto-Fill humidifier chamber, for all patient groups.
For use with AIRcon respiratory gas humidifiers only.

AIRline CPAP

Our high-quality AIRline CPAP breathing tube for sleep therapy is the result of cutting-edge technology combined with premium materials.

With an inner diameter of 15 mm or 19 mm, it enables optimal airflow while minimizing resistance thanks to “Smoothbore” technology. This maximizes the efficiency of sleep therapy, reduces noise levels, and contributes to a restful night’s sleep.

The AIRline CPAP breathing tube is compatible with all common CPAP devices and masks, ensuring seamless integration into existing therapy.
